The NSF-funded Natural Hazards Engineering Research Infrastructure offers a Research Experiences for Undergraduates (REU) program. Land a research opportunity at one of 11 multi-hazard engineering equipment sites during a 10-week summer research program.

Study areas include earthquake, wind, tsunami, coastal engineering, data management, cyberinfrastructure, reconnaissance and social science research.

- **WORK** with faculty and graduate students
- **WRITE** a professional, publishable research paper
- **NETWORK** with peers in research group meetings
- **LEARN** about grad school and career development
- **BUILD** relationships through mentoring
- **GAIN** hands-on research experience

**REU Block 1: June 2 - Aug. 10, 2021**
Florida International University  
Lehigh University  
University of California, Berkeley  
University of Florida  
University of Texas-Austin  
  • Mobile Shakers program  
  • Cyberinfrastructure  
University of Colorado Boulder

**REU Block 2: June 14 - Aug. 20, 2021**
Oregon State University  
University of California-Davis  
University of California-San Diego  
University of Washington

Undergraduates participate in hands-on, research-based projects in earthquake, wind, tsunami, or coastal engineering. Sites also include data management, cyberinfrastructure, reconnaissance and social science research.

“\( I \) got to see the flexibility, freedom, and unexpectedness that comes with conducting research and how everything helps shape you into a confident individual.”
