The Research Experiences For Undergraduates (REU) program offers research opportunities at 10 multi-hazard engineering equipment sites during a 10-week summer research program.

Study areas include earthquake, wind, tsunami, coastal engineering, data management and cyberinfrastructure.

Benefits of Participation
- WORK with experienced faculty and graduate students
- WRITE a professional, publishable research paper
- NETWORK with peers in research group meetings
- LEARN about graduate school and career development
- BUILD relationships through mentoring
- GAIN hands-on research experience

REU Block 1: May 27-August 4, 2020
Florida International University
Lehigh University
University of California, Berkeley
University of Florida
University of Texas, Austin
  - Mobile shakers program
  - Cyberinfrastructure

REU Block 2: June 15 – August 21, 2020
Oregon State University
University of California, Davis
University of California, San Diego
University of Washington

Undergraduates participate in hands-on, research-based projects in earthquake, wind, tsunami, or coastal engineering. Sites also include data management and cyberinfrastructure components.

“...I got to see the flexibility, freedom, and unexpectedness that comes with conducting research and how everything helps shape you into a confident individual.”
